OLUFEMI DOMINIC FABIAN

ELECTRICAL/ELECTRONIC ENGINEER · ENTREPRENEUR · DATA ANALYST

Abuja, FCT, Nigeria · +234 813 834 2270 · olufemidominic@gmail.com
dohaprimeventure.com · fishtrackpr.netlify.app · Nationality: Nigerian

PROFESSIONAL PROFILE

Electrical/Electronic Engineering graduate with a strong foundation in quantitative analysis, data systems and applied technology. Entrepreneur across financial markets and agribusiness, with demonstrated expertise in farm management systems, embedded hardware, financial modelling and data-driven decision-making. Designs, builds and deploys full-stack software and IoT instrumentation in active production use, and applies FCR modelling and cost-benefit analysis to commercial aquaculture operations. Currently serving under the NYSC programme at the Federal Ministry of Power and reading for an MSc in Financial Engineering at WorldQuant University. Motivated to advance quantitative methods that drive innovation across agricultural technology and financial systems in emerging economies.

PROFESSIONAL EXPERIENCE

Founder & Product Lead — FishTrackPro

2026 – PRESENT

Doha Prime Ventures Limited (RC 8674998) · Abuja, Nigeria

- Built and launched FishTrackPro, a farm-management and water-monitoring platform for commercial catfish farms, developed from twenty-five structured customer interviews and now used by eight paying farms.
- Designed the IoT sensor end to end — a solar-powered ESP32 node reading temperature, dissolved oxygen and pH, with un-ionised ammonia risk computed from pH and temperature.
- Architected deterministic rules-based alerting with an LLM advisor restricted to explanation, so a safety alert never depends on a model responding.
- Implemented server-side Web Push, the sensor ingest API, Firestore data model and device authentication.
- Localised the advisor into English, Hausa, Igbo and Yoruba following user testing with farm staff.
- Authored a 36-month financial model (1,800+ formulas, balancing statements) underpinning a ₦12m raise.
- Stack: JavaScript · React · Firebase/Firestore · Netlify Functions · Arduino/C++ (ESP32) · Anthropic API.

Founder & Agribusiness Manager

2025 – PRESENT

Doha Prime Ventures Limited · Abuja & Plateau State, Nigeria

- Founded and operate a commercial catfish business across four earthen ponds, managing full production cycles from fingerling stocking through processing, packaging and retail distribution.
- Apply feed-conversion modelling, profitability projection and multi-scenario cost-benefit analysis to stocking and harvest decisions.
- Lead a horticulture pilot in Jos, Plateau State covering Hass avocado and strawberry alongside volume fruit crops in Abuja.

Engineering Intern — NYSC

DEC 2025 – PRESENT

National Youth Service Corps · Federal Ministry of Power · Maitama, Abuja

- Technical assistant to the Office of the Deputy Director, Energy Resources — supporting policy analysis, administrative coordination and internal reporting within the energy planning division.
- Practical exposure to national energy infrastructure, power-sector regulation and government policy implementation.

Founder & Lead Analyst

2024 – PRESENT

Visionary Prime Capitals Ltd · Abuja, Nigeria

- Systematic forex trading practice built on structured technical analysis, documented journaling and volatility-based position sizing, with the goal of transitioning to algorithmic execution.

EDUCATION

MSc, Financial Engineering
2026 – PRESENT

WorldQuant University (online)

B.Eng, Electrical/Electronic Engineering
2017 – 2023

Akwa Ibom State University, Ikot Akpaden · Second Class Upper (2:1) · CGPA 3.98 / 5.0

- Key coursework: Engineering Mathematics I–IV · Matrix & Vector Algebra · Numerical Analysis · Statistics & Probability · Computer Systems Architecture · Object-Oriented Programming · Control Theory I & II · Digital Signal Processing · Data Communication & Networking · Engineering Economics.

AWARDS & CERTIFICATIONS

BATN Foundation, Farmers for the Future 2026
Competitive agricultural grant, ₦3,000,000.

FCMB AgriTech Programme 2026
Selected participant; completed the operational excellence module and implementation pledge.

ACE Startup Academy 2026
Pitched FishTrackPro at the preliminary round, Abuja.

Google AI Professional Certificate 2026
Google / Coursera. Eight courses across AI fundamentals, research, writing, content creation, data analysis, app building and deployment. coursera.org/verify/professional-cert/L6V1JYFLOO9Q

CS50P — Programming with Python —
Harvard University (online).

TECHNICAL SKILLS

SOFTWARE	JavaScript · React · Node · Firebase/Firestore · Netlify Functions · Python · HTML/CSS · Git
HARDWARE & IOT	ESP32 / Arduino (C++) · sensor calibration · solar field nodes · device authentication and telemetry
AI	LLM integration · prompt design and safety guardrails · retrieval over structured records · multilingual deployment
QUANTITATIVE	Financial modelling · unit economics · FCR and yield analytics · cost-benefit and scenario analysis
DOMAIN	Commercial aquaculture · water quality management · horticulture · agricultural supply chains

LANGUAGES

English — full professional · Yoruba — native · German — beginner

RESEARCH INTERESTS

Data science for agricultural productivity and food systems · machine learning for yield and supply-chain optimisation · verifiable farm data as a route to agricultural credit · algorithmic trading.

REFEREES

Engr. Dr. Ubong Ukommi
Lecturer, Electrical/Electronic Engineering
