01 Problem

For Commercial Aquaculture Farmers in Nigeria, the repeated problem is experiencing recurring but preventable losses because they farm without real-time data.

02 Solution

FishTrackPro is building a farm intelligence IoT driven platform that prevnts losses and proves creditworthiness for commercial aquaculture farmers in Nigeria to achieve profitable farms banks will finance.

03 UVP

We help commercial aquaculture farmers in Nigeria do turn their ponds into profitable, bankable assets better by replacing guess work with real-time farm intelligence, unlike notebooks and test-strips that show losses only after they have occured.

04 Unfair Advantage

A competitor starting today would need years of hands-on farming experience or deep, trust-earned relationships with farmers because our farmers don't see us as software vendors studying them — they see us as one of their own, which is why our interviews and onboarding conversations surface honest, detailed answers competitors would struggle to get, and why our product decisions (like feed brand flexibility, auto-calculated feed cost, harvest projection) reflect real operational understanding, not guesswork..

05 Customer Segments

Primary ICP: commercial catfish farm owner-operators managing 2,000–10,000+ fish per cycle in Nigeria in beginning with Abuja, Ogun and Lagos, behavior: tracks farm activity on paper or not at all, uses WhatsApp daily, has lost stock without knowing why, and cannot access formal credit, JTBD: protect their investment through a full cycle and prove their farm is worth financing..

06 Key Metrics

Key Metric 1: Monthly Retention Rate - (Customers at start of month – Customers lost during month) ÷ Customers at start of month × 100 - Target: Maintain 0% monthly churn through scale to 20+ subscribers
Key Metric 2: Month-on-Month Revenue Growth Rate - (Current month revenue – Previous month revenue) ÷ Previous month revenue × 100 - Target: Sustain 40–60% MoM growth over the next quarter (currently 61%)
Key Metric 3: Activation Rate - (New users who log at least one real data entry within 7 days) ÷ (Total new registrations) × 100 - Target: TBD — baseline test in progress; target will be set once first-time-user testing is complete

07 Channels

Primary channel: Fish feed and aquaculture accesorry supplier, cooperate partnership, WhatsApp groups, Facebook groups, Facebook & TikTok Ads, direct contact/referrals. Trust tactic: peer proof. CAC assumption: [amount].

08 Cost Structure

COGS: Naira 425,000
Operation Cost: Naira 3,500
Customer Acquisition Cost: Naira 15,000
Other Costs: Naira 0
Total Cost: Naira 443,500

09 Revenue Streams

Model 1: Direct Sales = Naira 95,000
Model 2: Direct Sales = Naira 350,000
Model 3: Subscription = Naira 7,574
