OLUFEMI DOMINIC FABIAN

ELECTRICAL/ELECTRONIC ENGINEER · ENTREPRENEUR · DATA ANALYST

Abuja, Federal Capital Territory, Nigeria
+234 813 834 2270
olufemidominic@gmail.com
dohaprimeventure.com
Date of birth: 20 September 1996 | **Nationality:** Nigerian

PROFESSIONAL PROFILE

A driven and analytically-minded **Electrical/Electronic Engineering graduate** with a strong foundation in quantitative analysis, data systems, and applied technology. Experienced entrepreneur across financial markets and agribusiness, with demonstrated expertise in farm management systems, financial modelling, and data-driven decision-making. Developed and deployed a **full-stack farm management application** using React and Firebase currently in active production use. Applies **FCR modelling and cost-benefit analysis** to commercial aquaculture operations, and maintains a structured forex trading practice with systematic risk management. Currently serving under the **NYSC programme at the Federal Ministry of Power**. Motivated to advance formal expertise in **Data Science and quantitative methods** to drive innovation across agricultural technology and financial systems in emerging economies.

EDUCATION

Bachelor of Engineering (B.Eng) — Electrical/Electronic Engineering

Akwa Ibom State University (AKSU), Ikot Akpaden, Akwa Ibom State, Nigeria

Second Class Upper Division (2:1) · CGPA: 3.98 / 5.0

Key Coursework: Engineering Mathematics I–IV · Matrix & Vector Algebra · Numerical Analysis · Statistics & Probability · Computer Systems Architecture · Object-Oriented Programming · Control Theory I & II · Digital Signal Processing · Data Communication & Networking · Computer-Assisted Applications · Engineering Economics

2017 – 2023
Graduated Oct. 2023

PROFESSIONAL EXPERIENCE

Engineering Intern — National Youth Service Corps (NYSC)

Federal Ministry of Power · Maitama, Abuja, Nigeria

December 2025 – Present

- Assigned as technical assistant to the Office of the Deputy Director of Energy Resources, supporting policy analysis, administrative coordination, and internal reporting within the Ministry's energy planning division.
- Gained practical exposure to Nigeria's national energy infrastructure, power sector regulatory frameworks, and government policy implementation processes governing electricity generation and distribution.
- Participated in internal departmental activities relating to energy resource planning, documentation, and stakeholder correspondence.

Founder & Agribusiness Manager

Doha Prime Ventures (dohaprimeventure.com) · Abuja & Plateau State, Nigeria

February 2025 – Present

- Founded and operate a commercial catfish aquaculture business across four earthen ponds in Abuja, managing full production cycles from fingerling stocking through dry fish processing, packaging, and retail distribution.
- Designed, developed, and deployed a **full-stack farm management system** (React.js · Tailwind CSS) that tracks inventory, sales, expenses, supply logistics, harvest records, and staff activity in real time — currently in active use.
- Built and integrated a live **Farm Tracker** into the company website (dohaprimeventure.com), streaming real-time farm growth metrics and production updates to customers and stakeholders for transparency and trust.
- Conduct detailed **Feed Conversion Ratio (FCR) modelling**, profitability projections, and multi-scenario cost-benefit analyses to inform stocking decisions and maximise return per production cycle.
- Oversee a multi-location orchard project in Jos, Plateau State — managing premium horticultural crops including Hass Avocado and Strawberries — alongside volume fruit crops in Abuja.
- Manage procurement, logistics coordination, customer acquisition, and digital marketing campaigns across Facebook, Instagram, and WhatsApp for both fresh and processed fish product lines.

Founder & Lead Analyst

Visionary Prime Capitals Ltd (VPC) · Abuja, Nigeria

September 2024 – Present

- Founded a financial markets venture focused on systematic forex trading using structured technical analysis,

disciplined risk management, and documented trade journaling on major currency pairs including GBP/USD.

— Developing a verifiable performance track record through a systematic trading journal methodology, with a long-term goal of transitioning to algorithmic and data-driven trading strategies.

— Researched and applied frameworks in trading psychology, volatility-based position sizing, risk-to-reward optimisation, and Forex market microstructure.

SKILLS & COMPETENCIES

Programming & Development: JavaScript, React.js, HTML/CSS, Python (CS50P — Harvard)
Data & Quantitative Analysis: FCR modelling, cost-benefit analysis, financial projections, production cycle analytics
Financial Markets: Forex technical analysis, risk management, position sizing, trade journaling
Agribusiness Operations: Aquaculture management, horticulture, supply chain coordination, dry fish processing
Engineering Fundamentals: Control systems, digital communications, circuit theory, signal processing, numerical analysis
Soft Skills: Entrepreneurship, strategic planning, analytical problem-solving, team leadership, adaptability

RESEARCH INTERESTS

- Data Science applications in agricultural technology and food systems
- Machine learning for yield optimisation and supply chain analytics
- Algorithmic and systematic trading in financial markets
- FinTech and financial inclusion for SMEs in emerging economies
